

Monthly Report

No:2/6

Name of Intern: Khayal Faisal Almohawes

Name of Employer: STC

Name of Faculty Advisor: Zeyad Ghaleb Almekhlafi

Academic Department: Information Security

Instructions:

The monthly progress report is to be completed and signed by the Intern every month, discussed with the Site Supervisor. **All monthly reports will be sent to the COOP Director and to the Faculty Advisor at the same time.** It must be faxed to (966) 53510228 or emailed to coop-ccse@uoh.edu.sa no later than the Sunday following the month period it covers. **IMPORTANT!: Each of the following five items must be at least thirty words long and typed in paragraph form**

Describe your principal assignment and responsibilities during the last month (Please tell us the exact nature of the job or jobs you were given. Also tell us whether this is according to the Training Plan you sent us at the beginning of your internship. If not, tell us why. You may need to ask your Site Supervisor for the reason why). **(Total 3 marks)**

Area	Description	marks
Workplace Administrative	1. This month, I worked on following up and managing customer experiences on Google Maps. 2. Customers were contacted by phone, questionnaires were filled out to measure customer satisfaction, and monthly reports were prepared.	1
Work place technical experience	I participated in implementing phishing simulations to understand cyber attack methods and analyze potential vulnerabilities, which helped enhance my cybersecurity expertise.	1
Self-developed program	I developed my skills in analyzing customer survey data using Excel and some statistical tools, which helped me transform raw data into accurate performance indicators.	1

2. What experiences were particularly rewarding during this report period? (Here tell us what you think you learned, what technical/professional aspects of your job you found enlightening and why. For example, you can tell us things like similarities or differences between what you thought things would be like and what they really are; how your mastery of any UOH-learned subject helped you accomplish a task, etc. Your answer must reflect technical/professional understanding). (Total 3 marks)

Area	Description	marks
Workplace Administrative	It was beneficial to observe the direct impact of customer experience management on Google Maps, as this was reflected in the improvement of the organization's ratings and increased customer satisfaction.	1
Work place technical experience	The phishing simulation was a valuable learning experience, allowing me to apply theoretical cybersecurity knowledge in a practical environment	1
Self-developed project	I gained more confidence in analyzing customer satisfaction data and converting results into reports that support decision-making, which strengthened my analytical thinking skills.	1

3. What experiences were particularly disappointing or frustrating? (Here tell us what aspects of your job you found harder or less interesting than others and why. You can also tell us of any job-related problems you encountered; how they were or could be solved or why you think the solution taken was not the most appropriate. Here too, your answer must reflect technical/professional understanding). (Total 3 marks)

Area	Description	marks
Workplace Administrative	I faced difficulties when contacting some customers by phone, as some were uncooperative or did not complete the survey.	1
Work place technical experience	One of the challenges I encountered in the phishing simulation was that creating realistic scenarios required detailed knowledge of attack techniques, which demanded more time for research and preparation before execution.	1
Self-developed program	none	1

4. Describe other professional growth opportunities (e.g., conferences, meetings, workshops) that you were able to capitalize on during the past month and/or hope to have over the next month. (Tell us how you think a meeting, workshop, etc was beneficial to you). (Total 3 marks)

Area	Description	marks
Workplace Administrative	During the Northern Region Town Hall prep meeting, I coordinated logistics, scheduled tasks, and prepared attendance lists. This enhanced my strategic planning and multitasking skills in large-scale event management.	1
Work place technical experience	I tested Webex's audio/video quality, backup solutions, and security settings for the Town Hall. This improved my virtual platform troubleshooting and live-streaming expertise.	1
Self-developed program	I created a post-event feedback form and a technical/admin checklist to streamline future events. This strengthened my problem-solving and process optimization skills.	1

5. Tell us what your training plan for the next month is. Also tell us what activities you will carry out to accomplish the objectives outlined in this plan. (Ask your Site Supervisor for this. If they have no specific plan in place, ask him to tell you what he thinks you will most likely be asked to do). (Total 3 marks)

Area	Description	marks
Workplace Administrative	I will participate in the preparatory meeting to discuss the technical and logistical requirements of the Town Hall event for the Northern Region, while also coordinating with Hail Province regarding the Digital Awareness Caravan initiative. In addition, I will be involved in coordination with various company sectors to ensure full readiness for the National Day event.	1
Work place technical experience	I will focus on testing the readiness of the Webex platform and ensuring its efficiency in supporting interactive broadcasting during the Town Hall event. I will also assist in monitoring network requirements and technical support for the National Day event, including testing connection speed and service stability.	1

Self-developed program	I plan to enhance my skills in managing virtual events by self-training on advanced Webex tools. I will also work on improving my ability to use analytical tools to measure the effectiveness of digital awareness initiatives.	1
------------------------	--	---

6. Other comments. (Here you are free to write anything; you can also complain about us if we are not doing something you think we should be doing; for example answering your emails, phone calls, etc.)

I thank STC and the university for their excellent support and great collaboration. Everything is well-organized and professional, with no negative remarks. I'm very happy with this experience and look forward to growing more in Information security
